

Add and Verify Your Card in Apple Wallet

Before You Begin

- Have the iPhone containing Apple Wallet available.
- Be prepared to receive a verification code by text message, email or call the displayed verification number.

Security Reminder

Never share your verification code with anyone who contacts you unexpectedly.

Add the card and begin verification

Step 1: Review the Terms and Conditions

Read the Digital Wallet Terms and Conditions. Select Agree to continue adding the card to Apple Wallet.

Step 2: Confirm the Card Was Added

Apple Wallet displays Adding Card followed by confirmation that the card has been added to Wallet.

Tip: The card still requires verification before it is ready for Apple Pay.

Choose a verification method

Step 3: Open Card Verification

On the card screen, locate Verification Required and select Complete Verification.

Step 4: Select how to verify

Choose the available verification option. The screen may offer a text message to the masked phone number, and email or you have to call the phone number shown. Select Next.

Tip: Confirm that the masked phone number is one you recognize before requesting a code.

Step 5: Enter the Verification Code

Enter the Fountain Trust Company verification code in the Verification Code field, then select Next. If needed, select Send New Code.

Tip: Treat the code as confidential. Bank employees should not ask you to disclose it.

Step 6: Confirm Activation

A Card Activated message with a check mark confirms that the card is ready for Apple Pay.

Confirm the card is ready to use

Step 7: Review the Wallet Card

Return to the card in Apple Wallet. The card panel displays that The Fountain Trust Company is ready for Apple Pay.

Tip: Select How to Use Apple Pay if you want to review the on-screen Apple Pay guidance.

If verification is not completed

Return to the card in Apple Wallet and select Complete Verification. If the verification options displayed are not available to you, use your organization's approved support process for assistance.

Quick Completion Checklist

- ☐ Terms and Conditions accepted
- ☐ Card added to Apple Wallet
- ☐ Complete Verification selected
- ☐ Verification method selected
- ☐ Verification code entered, if requested
- ☐ Card Activated confirmation displayed
- ☐ Card shows Ready for Apple Pay
- ☐ No additional verification prompt remains

Security reminder

Only enter a verification code within the Apple Wallet verification screen you opened yourself. Do not give the code to an unexpected caller or message sender.

Set The Fountain Trust Company Debit Card as Your Default Card

1. Open the Wallet app.
2. Touch and hold the debit card you want to make the default.
3. Drag the card to the front of your card stack.
4. Release the card. It is now your default payment card.

Alternative Method

1. Open Settings.
2. Select Wallet & Apple Pay.
3. Under Transaction Defaults, select Default Card.
4. Choose your preferred debit card.
